1064 Kufrin Way, Lombard, IL, USA, 60148
PHONE: (630) 632-4464
E-mail: ededkova@hotmail.com

OFFICE: Dept. of Molecular Biophysics and Physiology
Rush University Medical Center
1750 W. Harrison St., Suite 1419
Chicago, IL 60612
OFFICE PHONE: (312) 563-3227
OFFICE FAX: (312) 942-8711
E-MAIL: Elena_Dedkova@rush.edu

EDUCATION

1999: Ph. D. in Cell Physiology and Biophysics, Institute of Cell Biophysics, Russian Academy of Sciences, Pushchino, Russia
1991: D.V.M., Moscow State Academy of Veterinarian Medicine and Biotechnology, Russia
1989: M.Sc. in Biochemistry, Moscow State Academy of Veterinarian Medicine and Biotechnology, Russia

PROFESSIONAL EXPERIENCE

2008 - Present Assistant Professor, Department of Molecular Biophysics and Physiology, Rush University Medical Center, Chicago, IL
2006 - 2008 Research Assistant Professor, Department of Physiology, Loyola University Medical Center, Maywood, IL
2004 - 2006 American Heart Association fellow, Department of Physiology, Loyola University Medical Center, Maywood, IL
1999 - 2004 Postdoctoral Research Associate, Department of Physiology, Loyola University Medical Center, Maywood, IL
1994 - 1999 Graduate Student, Institute of Cell Biophysics, Russian Academy of Sciences, Pushchino, Russia

Short-term visits:

2014 Visiting Researcher, Department of Cancer Biology and Pharmacology, University of Illinois College of Medicine, Peoria, IL
2013 Visiting Researcher, Comprehensive Heart Failure Center, University of Wurzburg, Wurzburg, Germany
2010, 2012 Visiting Researcher, Department of Physiology and Institute of Neurology, University College London, UK

HONORS and AWARDS

01/2015 Chair, University Council Meeting, Rush University Chicago
2013 Co-chair, Session "Role of mitochondria in cell death" at the 57th Annual

- 2007 Meeting of Biophysical Society, February 2-13, 2013, Philadelphia, PA
 AHA Greater Midwest Scientist Development Grant,
 Mechanisms of mitochondria-mediated cardioprotection by trimetazidine in
 ventricular myocytes
- 2004-2006 AHA Greater Midwest Affiliate, Postdoctoral Fellowship
- 1999 FEBS Award for Participation in FEBS Advanced Course:
 Free Radicals, Nitric Oxide and Antioxidants in Health and Disease
- 1996-1998 Jorge Soros Award for Advanced Postgraduate Students, Moscow

ACADEMIC SERVICE

- 2015-present Dean Search Committee Member for Rush University Medical College
- 2014-present Elected Secretary, University Council, Rush University Chicago
- 2014-present Advisory Committee Member, Department of Molecular Biophysics and
 Physiology, Rush University Medical Center
- 2013-present Diversity and Inclusion Committee Member, Elected University Council
 Representative, Rush University
- 2012-present University Council Member, Rush University Chicago
- 2011-present Elected Council Member for the Bioenergetics Subgroup of the Biophysical
 Society
- 2011-present Faculty Council Member, Rush University Medical College

RESEARCH

- 2012-Present Roles of poly- β -hydroxybutyrate, the polymerized form of the ketone body β -
 hydroxybutyrate, in diabetes-mediated cardiomyopathy and cardiac cell death.
- 2011-Present Regulation of mitochondrial permeability transition pore during cardiac
 ischemia-reperfusion: roles of Ca^{2+} , reactive oxygen species and inorganic
 polyphosphate.
- 2010-Present Roles of inorganic polyphosphate in Ca^{2+} -induced mitochondrial permeability
 transition pore activation in cardiac myocytes.
- 2008-2012 Mitochondrial impairment in heart failure and mechanisms of mitochondria-
 mediated cardioprotection by trimetazidine.
- 2006 - 2008 Molecular mechanisms of mitochondrial nitric oxide and reactive oxygen
 species generation in cardiac myocytes. Role of cytoskeleton in regulation of
 nitric oxide generation in ventricular myocytes.
- 2005-2006 Mitochondrial contribution to decoding of fast cytosolic Ca^{2+} -transients in
 cardiac ventricular myocytes: slow mode of mitochondrial Ca^{2+} accumulation
versus fast beat-to-beat uptake.
- 2002 - 2005 Study of nitric oxide-dependent regulation of alpha- and beta-adrenergic
 mediated Ca^{2+} signaling pathways in cardiac (atrial and ventricular)
 myocytes.
- 2003-2004 Mechanisms of mitochondrial nitric oxide generation and its effects on
 mitochondrial Ca^{2+} entry and release in vascular endothelial cells.
- 2002 - 2003 Effects of thyroid hormone on cardiac Ca^{2+} and Na^{+} handling in the heart.

- 2000 - 2002 Regulation of store-operated calcium entry by nitric oxide (NO) in vascular endothelial cells. Investigation of cellular mechanisms of the regulation of NO generation and release from vascular endothelial cells.
- 1994 - 1999 Molecular mechanisms of store-operated Ca^{2+} entry in non-excitable cells.
- 1992 - 1994 Study of the mechanisms governing mitochondrial membrane potential, mitochondrial ion channels, and the role of mitochondria for cellular calcium homeostasis and cell death.

PROFESIONAL MEMBERSHIP

- 2013 - present Member, Cardiac Muscle Society
- 2011 - present Elected Council Member, Bioenergetics Subgroup of the Biophysical Society
- 2003 - present Member, American Heart Association (AHA), Basic Science Council
- 1999 - present Member, Biophysical Society

TEACHING, PROFESSIONAL DEVELOPMENT AND MENTORING

Teaching courses and lectures:

- 2014-present **Seminar Series Director** at the Department of Molecular Biophysics and Physiology, Rush University Medical Center, Chicago, IL
- 2008 - 2014 **Lectures and Journal Club Director** at Section of Calcium Signaling (together with Prof. Eduardo Rios) as part of the "Molecular Biophysics and Physiology" Graduate Program, Rush University, Chicago, IL
- 2013 **"Mitochondria and cellular Ca^{2+} handling"** lecture presented as part of Journal Club Discussion Group at the Department of Mol. Biophysics and Physiology, Rush University Medical Center
- 2012 Lecture **"Mitochondrial Ca^{2+} transport in cardiac myocytes: contribution to cardiac excitation-contraction coupling"** presented as part of Journal Club Discussion Group at the Department of Mol. Biophysics and Physiology, Rush University Medical Center
- 2011 Lecture **"Methods to study mitochondrial metabolism and calcium handling in cardiac myocytes"** presented as part of Journal Club Discussion Group at the Department of Mol. Biophysics and Physiology, Rush University Medical Center
- 2007 **Nitric Oxide Signaling lectures** as a part of Signal Transduction Course (Fall Semester 2007) for Physiology 471 Graduate Program at Loyola University Medical Center, Maywood, IL. Course director: Mitchel F. Denning, PhD, Associate Professor of Pathology, Loyola University Medical Center, Maywood, IL
- 1998- 1999 **Laboratory course supervisor** for postgraduate students of Pushchino State University, Russia: "Use of fluorescence techniques to measure intracellular Ca^{2+} and pH in living cells". Course director: Valery P. Zinchenko, PhD, Professor of Physiology, Pushchino State University, Pushchino, Russia

Professional development:

02/2015	“Teaching Excellence Course” , Rush University Medical Center Teaching Academy
11/2014	“Grant writing” workshop, Rush University Medical Center Teaching Academy
10/2014	“Understanding Research: An Overview for Health Professionals” Online Course, University of California, San Francisco, Professional Certificate
10/2014	“Interactive Classroom” Basic Training workshop, Rush University Medical Center Teaching Academy
06/2014	“How to Prepare Online Lecturing using Panopto” workshop, Rush University Medical Center Teaching Academy, presented by Heidy Zhao
05/2014	“Talent Management” workshop, Rush University Medical Center Teaching Academy, presented by Kurt Olson
03/2014	“Copyright Compliance for Faculty” workshop, Rush University Medical Center Teaching Academy, presented by Christine Frank
02/2014	“How to Plan and Design Quality Test Questions” workshop, Rush University Medical Center Teaching Academy, presented by Lola Coke
01/2014	“How to prepare Quality Test Questions” workshop, Rush University Medical Center Teaching Academy, presented by Rosemarie Suhayda
12/2013	“Data Management and Analysis with Excel” , Rush University Medical Center, Professional Certificate. Developed by Briana Jegier, PhD, CLC
12/2013	“How Communication Styles Affect Leadership Skills” workshop, Rush University Medical Center Teaching Academy, presented by Melinda Noonan
11/2013	“Budgets & Rules of Funds and Cost Centers” workshop, Rush University Medical Center Teaching Academy, presented by John McClatchy
10/2013	“Communicating Effectively: Getting Your Points Across” workshop, Rush University Medical Center Teaching Academy, presented by Melanie Dreher
09/2013	“Building and managing your research” workshop, Rush University Medical Center Teaching Academy, presented by Mary Jane Welch

Trainees:

2014, 2013	Isaac Philip, summer student
2011 - 2012	Vanessa Juettner, research technician
2009 - 2011	Lea K. Seildmayer, Dr. med., PhD, postdoctoral fellow
1997 - 1999	Tatyana Belyaeva, predoctoral fellow
1994 - 1999	Valentina Musienko, research technician

INVITED PRESENTATIONS:**Seminars:**

2014	Invited speaker at the Department of Cancer Biology and Pharmacology, University of Illinois College of Medicine, Peoria, IL, Invited by Dr. E. Zakharian.
2014	Seminar speaker at the Department of Pharmacology, University of California at Davis, Davis, CA, Invited by the chair, Professor, Dr. Donald M. Bers. “Mitochondrial impairment in heart failure and mechanisms of mitochondria-

- mediated cardioprotection by trimetazidine”.
- 2013 Invited speaker at the Cardiovascular Aging Research Laboratory, Center for Integrative Research on Cardiovascular Aging, Aurora Research Institute, Milwaukee, WI, Invited by the director of the Cardiovascular Aging Research Laboratory, Prof. Dr. Arshad Jahangir.
- 2012 Invited speaker at the Comprehensive Heart Failure Center, University of Wurzburg, Wurzburg, Germany, “Mechanisms of mitochondria-mediated cardioprotection by trimetazidine in rabbit heart failure”. Invited by the director of the Comprehensive Heart Failure Center, Prof. Dr. Oliver Ritter
- 2011 Invited Talk presented at the Institute of Molecular Cardiobiology, John Hopkins University, Baltimore, Maryland, “Inorganic Polyphosphate and Mitochondrial Function in Cardiac Myocytes: role in mPTP opening and protection against ischemia-reperfusion injury.” Invited by Dr. Miguel Aon.
- 2010 Invited seminar presented at the Hatter Cardiovascular Institute, Department of Cardiovascular Medicine, University College of London, “Mitochondrial calcium and nitric oxide signaling in the heart”. Invited by Dr. Derek Hausenloy.
- 2007 Invited seminar presented at the Department of Molecular Biophysics and Physiology, Rush University Medical Center “Mitochondrial calcium and nitric oxide in the heart”. Invited by the chair Dr. Robert Eisenberg.
- 2005 Seminar presented at Physiology Department, Loyola University Chicago “Mitochondrial calcium –nitric oxide signaling in vascular endothelial cells”.
- 2002 Seminar presented at Physiology Department, Loyola University Chicago “Calcium signaling in vascular endothelial cells: capacitative Ca^{2+} entry and nitric oxide”.

Symposia:

- 2013 Talk presented at the 4th Retreat of the Foundation Lequcq Transatlantic Network of Excellence on “Redox and Nitrosative Regulation of Cardiac Remodeling: Novel Therapeutic Approaches for Heart Failure”, Turin, Italy, “ Ca^{2+} -dependent ROS generation during ischemia triggers mPTP-dependent cell death during reperfusion”.
- 2013 Invited talk presented at the 57th Annual Meeting of Biophysical Society, February 2-13, 2013, Philadelphia, Pennsylvania, “ Ca^{2+} -dependent ROS generation during ischemia triggers mPTP-dependent cell death during reperfusion”.
- 2012 Invited speaker at 2012 Gordon Research Conference, Cardiac Regulatory Mechanisms, New London, NH, June 10-15, “Mitochondrial Ca transients”.
- 2012 Invited Point-Counterpoint Presenter at 2012 Gordon Research Conference, Cardiac Regulatory Mechanisms, New London, NH, June 10-15: “Is there a mitochondrial localized NOS?”
- 2012 Talk presented at the 3rd Retreat of the Foundation Lequcq Transatlantic Network of Excellence on “Redox and Nitrosative Regulation of Cardiac Remodeling: Novel Therapeutic Approaches for Heart Failure”, Park City, UT, “Inorganic Polyphosphate is a Potent Activator of the Mitochondrial Permeability Transition Pore in Cardiac Myocytes”.
- 2012 Invited speaker at the Cardiovascular Research Conference, Rush University Medical Center, Chicago, IL, “Mechanisms of mitochondria-mediated

- cardioprotection by trimetazidine in rabbit heart failure". Invited by Dr. Gary Schaer.
- 2011 Invited speaker at 2011 British Society for Cardiovascular Research Autumn Meeting, Mitochondria in Cardiovascular Disease: Emerging Concepts and Novel Therapeutic Targets, "Increased activity of mitochondrial complex II in rabbit heart failure is associated with reactive oxygen species generation and impaired excitation-contraction coupling". Invited by Prof. Michael Duchon.
- 2011 Talk presented at the 2nd Retreat of the Foundation Lequcq Transatlantic Network of Excellence on "Redox and Nitrosative Regulation of Cardiac Remodeling: Novel Therapeutic Approaches for Heart Failure", Merton College, Oxford, UK, "Increased activity of the mitochondrial complex II in rabbit heart failure is associated with robust ROS generation and impaired excitation-contraction coupling".
- 2010 Talk presented at the 1st Retreat of the Foundation Lequcq Transatlantic Network of Excellence on "Redox and Nitrosative Regulation of Cardiac Remodeling: Novel Therapeutic Approaches for Heart Failure", Baltimore, MD, "Mitochondrial impairment in heart failure and cardioprotective effect of trimetazidine".

RESEARCH SUPPORT

Pending:

1) National Institutes of Health (NIH), R01 09/01/2015-08/31/2020

National Institute of Aging (NIA)

Role of ketone bodies and their polymers in failure of the aging diabetic hearts.

The goal of this project is to investigate the role of ketone bodies, their polymers and inorganic polyphosphate on activation and regulation of the mitochondrial permeability transition pore, cardiac excitation-contraction coupling and cell metabolism in control and diseased hearts.

Project Role: **Principal Investigator**

2) AHA Grant-in-Aid 07/01/2015-06/20/2017

American Heart Association (AHA)

Beta-hydroxybutyrate and its polymers in type-2 diabetic hearts: implications for physiology and cardiomyopathy. The goal of this project is to determine the effects of β -hydroxybutyrate and its polymer poly- β -hydroxybutyrate on cardiac performance and mitochondrial function in type-2 diabetes.

Project Role: **Principal Investigator**

3) NIH, 1R01CA137598-01A1 09/01/2015-08/31/2020

National Cancer Institute

Cellular responses to p53 activation by nutlin 3a

The goal is to investigate the cellular responses to p53 activation by nutlin 3a.

Principal Investigator: **Carl Maki**

Project Role: **Co-Investigator**

4) National Institutes of Health (NIH), R01 09/01/2015-08/31/2020

National Cancer Institute

Novel regulatory mechanisms of cell survival in bone metastasis

The goal is to investigate a novel regulatory mechanism of breast cancer metastasis via Runx2/ β -Arrestin-1/IGF-1R pathway.

Principal Investigator: **Jitesh Pratap**

Project Role: **Co-Investigator**

Completed research support:

1) National Institutes of Health (NIH), R01 HL101235-04 05/01/2010-03/31/2014

Mitochondrial dysfunction in cardiac hypertrophy and failure.

The goal of this project is to study mitochondrial disbalance in cardiac hypertrophy and failure.

Multiple Principal Investigators:

Lothar A. Blatter (Rush University)

Brian O'Rourke, Jennifer Van Eyk, Natalia Trayanova (Johns Hopkins University)

Donald M. Bers (UC Davis)

Project Role: **Co-Investigator**

2) Rush Translational Research Consortium Pilot Grant 09/01/2012-01/31/2014

β -hydroxybutyrate and its polymers in diabetic hearts: implications in cardiomyopathy.

The goal of this project is to determine the role of poly- β -hydroxybutyrate, the polymerized form of ketone bodies, in diabetes-mediated cardiomyopathy and cardiac cell death.

Project Role: **Principal Investigator**

3) Rush Translational Research Consortium Grant 12/01/2010-11/30/2012

Depletion of mitochondrial polyphosphate as a novel protection strategy against ischemia-reperfusion induced cell death.

The goal of this project is to study the role of the inorganic polyphosphate in protection against ischemia-reperfusion induced cell death.

Project Role: **Principal Investigator**

4) AHA Scientist Development Grant (SDG) 0735071N 07/01/2007-06/30/2012

American Heart Association (AHA), National Affiliate

Mechanisms of mitochondria-mediated cardioprotection by trimetazidine in

ventricular myocytes. The goal of this project is to study the mechanisms of mitochondria-mediated cardioprotection by trimetazidine during heart failure.

Project Role: **Principal Investigator**

5) AHA fellowship 0425761Z 07/01/2004-06/30/2006

American Heart Association (AHA)/Greater Midwest

Contractile activity stimulates nitric oxide production in cat ventricular myocytes through cytoskeletal-dependent mechanisms.

The goal of this study was to evaluate whether contractile activity modulates nitric oxide production in cardiomyocytes and to determine the underlying mechanisms.

Project Role: **Principal Investigator**

GRANT REVIEW PANELS

2014, 2015 American Heart Association, Cardiac Regulatory Mechanisms III Grants Review Committee, National Center

2013 Rush Translational Sciences Consortium Pilot Grants Review Committee for Projects in Woman's Cancer

2013 Ataxia UK Research Grant reviewer

2011 Rush Translational Sciences Consortium Pilot Grants Review Committee

REFFERAL AND EDITORIAL WORK

Editorial Boards:

2011-present Review Editor for Frontiers in Mitochondrial Research
2010-present Review Editor for Frontiers in Cardiac Muscle Physiology

Invited Book Editor:

2014-present Co-Editor (together with Drs. T. Kulakovskya and E. Pavlov), "Biological Function of Inorganic Polyphosphates in Eukaryotic Cells", 300 pages, 100 illustrations, Springer International Publishing AG, Gewerbestrasse 11, 6330 Cham, Switzerland.

Reviewer for Book Proposals:

Cellular & Molecular Biology, Humana Press (Book proposal review)
Elsevier Publishing House (Book proposal review)

Reviewer for Professional Journals:

American Journal of Physiology
Cardiovascular Research
Cardiovascular Drugs and Therapy
Cell Calcium
Circulation Research
Dove Medical Press
Experimental Gerontology
FEBS Letters
Frontiers in Mitochondrial Physiology
Frontiers in Cardiac Muscle Physiology
Gene
Journal of Applied Physiology
Journal of Molecular and Cellular Cardiology
Journal of Muscle Research and Cell Motility
